Get ready to launch your career in the exciting world of cybersecurity

APPLY NOW

If you have some background in cybersecurity and are eager to take your skills to the next level, this post is for you.

Enjoy flexible working hours, get in-house training from our industry-leading experts, and grow your career with us. Join our cybercrime-fighting team, work in a supportive environment, and make a positive difference while you learn and grow.

What You Will Do

- **Help us audit, monitor, and defend** our clients' business-critical systems against cyber threats
- **Analyse incidents** and work with us to develop defense strategies that stop cyber criminals in their tracks
- **Work with our senior cyber security experts** to combat emerging threats or spot vulnerabilities that could be open to exploitation
- **Stay on the cutting edge of the latest cybersecurity trends** while learning to use the latest tools and techniques

What We Offer

- **Growth:** We want you to succeed. You'll develop new skills, gain certifications, and have one-on-one access to a dedicated mentor
- **An innovative environment:** Explore your creative problem-solving skills and enjoy an energetic and innovative workplace
- **Work-life balance:** Flexible working hours and options including hybrid work
- **Competitive benefits:** Health insurance, a pension plan, and extra paid holiday allowance

About You

- You have **a lively interest in cybersecurity**, and you're eager to learn
- You have a basic understanding of **network protocols, firewalls, and encryption**
- Basic familiarity with tools like **SIEM** and **IDS/IPS** will be a plus
- You're a **problem-solver** and you pay close attention to detail
- You can work independently, but you also **enjoy working as a team**

Take your first steps toward success
